DEVANSH GOYAL

CYBERSECURITY ENGINEER | THREAT DETECTION & SOC SPECIALIST | DFIR & EDR

devanshgoyal1402@gmail.com | linkedin.com/in/goyaldevansh | github.com/Devansh7006

PROFESSIONAL SUMMARY

Analytical Cybersecurity Engineer & Threat Detection Specialist with hands-on experience in Digital Forensics & Incident Response (DFIR), SIEM/EDR engineering, and law enforcement cybercrime investigations. Active contributor to tier-1 open-source security platforms with 1,000+ to 35,000+ stars (Metasploit Framework, Wazuh SIEM/XDR, OWASP, Qubes OS). Architect & Creator of custom endpoint security and insider threat platforms (EDR/DLP) using Windows Win32 APIs, Python/FastAPI, and behavioral risk scoring mapped to MITRE ATT&CK. Ranked Top 4% globally on TryHackMe, excelling in memory forensics, IOC correlation, packet inspection, and automated detection pipelines.

TECHNICAL SKILLS & CORE COMPETENCIES

- **Security Operations & DFIR:** SIEM (Wazuh, Splunk ES), EDR Telemetry, Incident Response Lifecycle (NIST SP 800-61 Rev 2), Digital Forensics (FTK Imager, Autopsy, Volatility 3), Chain of Custody (NIST SP 800-86), Sysmon, Windows Event Logs (4624, 4688, 7045), Disk/Memory Forensics, IOC/IOA Correlation.
- **Threat Detection & Engineering:** MITRE ATT&CK Mapping, Sigma Rules, YARA Rule Development, Detection-as-Code (DaC), Behavioral Anomaly Detection, Endpoint Detection & Response (EDR) Architecture, Data Loss Prevention (DLP), Device Fingerprinting, Root Cause Analysis.
- **Threat Intelligence & OSINT:** Open-Source Intelligence (OSINT), Threat Attribution, National Cyber Crime Reporting Portal (NCRP), Phishing Triage, Email Security (SPF, DKIM, DMARC, RFC 5322), URL Reputation & Threat Feeds, Malware Triage & Dynamic Detonation.
- **AppSec, Network & Tools:** OWASP Top 10 (2021), Burp Suite Professional, Ghidra (Reverse Engineering), Nmap, Wireshark (PCAP Analysis), Network Security (TCP/IP, DNS, TLS/SSL), API Security, Vulnerability Assessment, Metasploit Framework.
- **Programming & Automation:** Python 3 (FastAPI, Scapy, Requests), Bash Scripting, PowerShell, SQL, Rust, Java, REST APIs, Git, Docker, CI/CD Pipeline Security (GitHub Actions), Linux/Unix CLI, Windows Internals & Win32 APIs, NIST CSF 2.0, ISO/IEC 27037.

PROFESSIONAL WORK EXPERIENCE

Cyber Security & Digital Forensics Intern | Cyber Crime Cell, Police Commissionerate Agra, India **May 2026 - July 2026**

- **Digital Forensics & Evidence Handling:** Supported live forensics, disk acquisitions, and timeline reconstruction for 100+ cybercrime cases, strictly adhering to NIST SP 800-86 and ISO/IEC 27037 chain-of-custody protocols with SHA-256 cryptographic verification.
- **Incident Triage & Threat Attribution:** Triaged high-priority cyber complaints via the National Cyber Crime Reporting Portal (NCRP), correlating IOCs (malicious IP blocks, phishing domains, mule accounts) to accelerate adversary attribution and case escalation.
- **OSINT & Threat Reporting:** Executed multi-source OSINT operations across DNS telemetry and registrar records, cutting investigation turnaround by 40%; authored formal forensic summaries and delivered cyber awareness workshops to 500+ citizens and law enforcement officers.

OPEN SOURCE SECURITY ENGINEERING CONTRIBUTIONS

Core Open Source Security Contributor | Upstream Repositories (1,000+ to 35,000+ GitHub Stars) **March 2026 - Present**

- **Wazuh SIEM/XDR Platform (10,000+ Stars | PR #9700):** Diagnosed and resolved custom detection rule failures and parent-child rule chaining (if_sid) anomalies in Wazuh 4.9.0, preventing telemetry drop-offs during multi-stage attacks and improving correlation reliability across enterprise endpoints.
- **Metasploit Framework - Rapid7 (35,000+ Stars | PRs #21187, #21186, #21147):** Contributed vulnerability documentation, test cases, and module improvements for HTTP auxiliary scanners and exploit tools (wordpress_pingback_access & http_put), validating attack vectors to enhance defensive detection signatures.
- **Qubes OS (7,000+ Stars | PR #38) & OWASP (PR #2066):** Audited policies for qubes-video-companion enforcing Xen inter-VM isolation and secure RPC boundaries; refined web vulnerability testing documentation mapped to OWASP Top 10; contributed software supply chain checks to OpenSSF Scorecard (#4969).

TECHNICAL SECURITY PROJECTS

Dikoryx - AI-Powered Endpoint Detection & Response (EDR) Platform [Live Demo: https://dikoryx.vercel.app | GitHub:https://github.com/Devansh7006/Dikoryx] *Python, FastAPI, React, Win32 APIs*

- **Endpoint Telemetry Architecture:** Engineered an enterprise Windows endpoint agent capturing real-time process execution lineages, file integrity modifications (FIM), USB drive insertions, and active VPN connection events via native Windows Win32 APIs.
- **Behavioral Risk Scoring & Console:** Implemented real-time risk-scoring heuristics mapped to MITRE ATT&CK insider threat techniques, flagging privilege escalation and policy violations; architected scalable FastAPI REST backends and an interactive React analyst console.

EmailSF - Enterprise Email Threat & Automated Phishing Detonation Engine *Python, REST APIs, Chrome Extensions*

- **200+ Parameter Email Threat Engine:** Engineered an automated email inspection pipeline evaluating 200+ RFC 5322 parameters, performing header forensics, SPF, DKIM, and DMARC alignment validation, and domain spoofing detection to neutralize BEC attacks.
- **Threat Feeds & Extension:** Integrated dynamic URL unshortening and domain reputation scoring to detect zero-day credential harvesting (reducing SOC triage overhead by 70%); developed a companion Chrome extension providing real-time in-inbox threat verdicts.

HONORS & COMPETITIVE ACHIEVEMENTS

- **TryHackMe Global Top 4%:** Ranked among Top 4% globally across 2M+ users for hands-on challenge completion in Network Defense, Privilege Escalation, and Digital Forensics.
- **2nd Place - NPCI Cybersecurity Hackathon (March 2026):** Secured 2nd position in national financial security hackathon organized by National Payments Corporation of India (NPCI) & IIT Kanpur, designing robust payment security defense models.
- **Top 5 - Capture The Flag (CTF) Competition (March 2026):** Placed in Top 5 out of 100+ elite teams in Capture The Flag organized by IIT Kanpur, solving reverse engineering, packet forensics, and web challenges.
- **3rd Position - Smart India Hackathon (SIH Internal) (September 2026):** Secured 3rd place in university-level Smart India Hackathon at GLA University for innovative cybersecurity architectures.

CERTIFICATIONS & EDUCATION

- **Professional Certifications:** Critical Infrastructure Protection (ICIP) - OPSWAT Academy | Security Operations Fundamentals - Palo Alto Networks | Junior Penetration Tester & CompTIA PenTest+ Path - TryHackMe | Intro to Cybersecurity & Networking - Cisco Networking Academy | Cyber Job Simulation - Deloitte | Problem Solving - HackerRank.

GLA University, Mathura, India | Bachelor of Technology in CSE (Cybersecurity & AI) | CGPA: 7.6 / 10.0 | 2024 - 2028
